

# TOP 8 AIR CONDITIONER PROBLEMS

We know air conditioner repairs can be costly. This is why it's important to schedule a check-up every spring....to uncover needed adjustments before they become a problem.

## Here Are 8 of The Most Common AC Problems...And What May Be Causing Them

# 1

### Unable To Turn On

- Faulty thermostat – check the batteries
- Circuit breaker has been tripped
- Damaged wiring
- Faulty motors
- Faulty compressor

# 2

### Turns On/Off By Itself

- Malfunctioning compressor
- Dirty outdoor coil
- Incorrectly programmed thermostat

# 3

### Trips the Breaker

- Loose or faulty wiring
- Shorted out compressor
- Dirty outdoor coil

# 4

### Noisy

- Object in fan
- Loose fan blade
- Loose parts

## 5

**Leaking**

- Clogged/broken drainage pipe
- Clogged/broken condensate pan
- Faulty pump
- Low on refrigerant gas
- Improper installation

## 6

**Air Isn't Blowing Cold**

- Dirty air filter
- Low on refrigerant gas
- Faulty compressor
- Faulty thermostat – check the batteries

## 7

**Air Blowing Smells Bad**

- Clogged water drain pipe
- Mold, fungus, and/or mildew in the drain or on the coil
- Dirty Filter

## 8

**Frozen**

- Could indicate clog in the system
- Blocked vents or ducts
- Low on refrigerant gas
- Damaged valves
- Dirty filters - when was the last time they were cleaned?
